RAD Float Switch

The All-in-1 RAD Float Switch replaces all common existing AC float switches used today. Made by AmRad, it features Capped, Flow-Thru, and Clip-on setup assembly options. Its translucent body allows for a quick visual confirmation of water presence. The RAD Float Switch is easy to install in the tightest spaces and has no pan height limitations!

Features:

- All-in-1 Float Switch
- Capped, clip on & Flow-Thru assembly options
- No limitation of pan height
- Made of Kibiton Resin™ a durable impact resistant material
- Can be used on all 24 V systems, 1 size fits all
- Translucent body allows for visual inspection of water presence reducing diagnosis time & cost
- Made in the USA
- No gluing or cutting existing drain lines on capped or clip-on versions
- Vertical deep well rotating head for a secure mount
- For use in metal or plastic drain pans
- Replaces the need to carry other brands with our all-in-1 float switch
- Automatic shut off if water is detected
- UL Listed
