GUH96T

SPECIFICATIONS

Configurations

· Upflow / Horizontal

Heat Exchanger Design

- Aluminized steel primary heat exchanger with crimped non-welded construction
- AL 29-4c stainless steel secondary heat exchanger

Cabinet Design

- · Compact 33" height
- · Standardized widths for easy coil fit
- · Unitized construction for cabinet integrity
- Heat exchanger compartment is insulated to increase efficiency and reduce sound levels
- Baked on pre painted steel cabinet finish

Air Delivery System

- · Efficient ECM variable speed blower motor
- Motor features "soft start" and "soft stop" for quiet operation
- · Active and passive dehumidification feature
- · Easily removable slide-out blower design
- Dynamically balanced blower wheel with resilient motor mounts for smooth and quiet operation

Controls

- · Two stage gas valve
- · Integrated ignition and fan control
- Control board retains last five (5) fault codes with push button memory recall, regardless of power interruption
- · Hot surface ignition system uses silicon nitride ignitor
- Control features 120 volt electronic air cleaner and humidifier terminals
- · Control circuit is fuse protected
- Color coded control wiring
- · Compatible with single or two stage thermostats for heating.
- Two stage thermostat is recommended when installed with two stage cooling unit.

Ventina

- 2-speed induced draft motor with stainless steel shaft, steel ball bearings, and fan cooled for long life
- Certified for direct vent (2-pipe) or non-direct (1-pipe) applications

Installation Features

- · Left or right gas and electric entry
- Zero step horizontal conversion
- · Removable floor base (upflow/horizontal units) for bottom return air

TWO-STAGE VARIABLE SPEED GAS FURNACE

96%

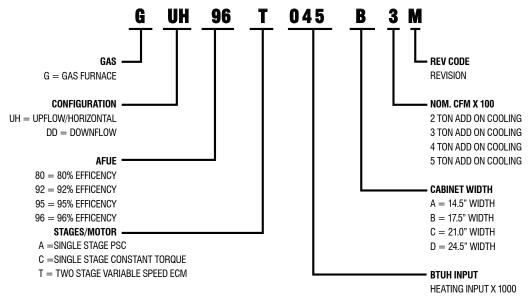

California Only

This furnace does not meet the South Coast Air Quality Management District (SCAQMD) Rule 1111 and San Joaquin Valley Air Pollution Control District (SJVAPCD) Rule 4905 NOx emission limit (14 ng/J) and cannot be installed within the SCAQMD or SJVAPCD and Bay Area.

FILTER REQUIREMENT DATA

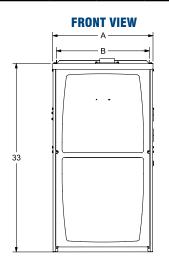

Airflow Descriptor	Disposable Filters	Cleanable Filters Minimum Area (sq. in.)			
Airliow Descriptor	Minimum Area (sq. in.)				
12	576	288			
16	768	384			
20	960	480			

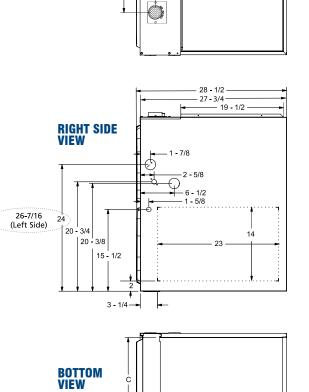

- 1. The Airflow Descriptor is the two digits following the "B", "C", or "D" in the model number; e.g. "20" is the Airflow Descriptor.

 2. Areas shown for permanent filters are based on filters rated at 600 feet per minute face velocity.

"This product complies with all California product labeling laws including, but not limited to, the Safe Drinking Water and Toxic Enforcement Act of 1986, more commonly known as Proposition 65."

Due to ongoing product improvements, specifications and dimensions are subject to change and correction without notice or incurring obligations. Determining the application and suitability for use of any product is the responsibility of the installer. Additionally, the installer is responsible for verifying dimensional data on the actual product prior to beginning any installation preparations. Third party incentive and rebate programs have precise requirements as to product performance and certification. All products meet applicable regulations in effect on date of manufacture; however, certifications are not necessarily granted for the life of a product. Therefore, it is the responsibility of the applicant to determine whether a specific model qualifies for these incentive/rebate programs.
