

# Comfort-Cire®

## HEAT PUMPS

14 to 16 SEER, 8.2 to 9.0 HSPF  
Single Stage & Two Stage

**CHOOSE RELIABILITY  
AND EFFICIENCY.**

# SOME DECISIONS ARE TOUGH. THIS ONE ISN'T.

When you consider a Comfort-Aire® system, quality and value are a given. You're getting peace of mind with great features and a smart design.

## Efficiency ratings

Consider the SEER ratings that measure system performance. Higher numbers mean greater efficiency and lower energy bills for you.

## Superior coil protection

For durability in harsh environments Total Corrosion Protection Technology is featured on select Comfort-Aire® heat pump units, protecting against corrosive elements and extending the life of your heat pump for years to come.

## Immediate savings

With a high-efficiency system, you may qualify for local utility and energy incentives as well as rebates.† Your Comfort-Aire® professional can provide you with the latest information so you can take full advantage of available money-saving opportunities.

## Is it time to replace your unit?

It can be hard to decide whether to repair or replace. Here are a few things to keep in mind when you're deciding:

- **Age of the unit** – You might want to consider a new unit if your heat pump is 10-12 years old.
- **Updates** – New technology makes units more efficient and easier to control. Plus, older units use R-22 refrigerant that's scarce and expensive to recharge.
- **Repair costs** – Once repair costs exceed 50% of the cost of a new unit, a new purchase might be in order.

† Check with your local utilities to confirm eligibility. Rebates and incentives for efficiency vary by locality and utility. Comfort-Aire does not make any representation, warranty, guarantee, or other assurance as to whether the each model qualifies or is eligible for rebates in your local area.

# WHATEVER YOUR NEEDS, A COMFORT-AIRE® AIR CONDITIONER IS THE RIGHT CHOICE.

## HRG14-S1P Single Stage

The **HRG14-S1P**\* delivers significant energy savings and efficiencies of up to 16 SEER and 9.0 HSPF, when paired with a matched Comfort-Aire® variable-speed or constant-torque furnace or air handler. Your Comfort-Aire® dealer can recommend the right pairing for your home.

## HRG14-S1M Single Stage

Greater efficiencies of up to 16 SEER and 9.0 HSPF, this single-stage **HRG14-S1M**\* delivers generous energy savings for both heating and cooling. Pair with a matched Comfort-Aire® furnace or air handler to maximize performance and better quality for local utility rebates.† Available upon depletion.

## HRG16-S1M Two Stage

With efficiencies of up to 16 SEER and 9.0 HSPF, the **HRG16-S1M** exceeds federal energy-efficiency standards. Helping to lower your monthly energy bill, this unit operates at lower speeds with longer cycles—allowing for more even temperatures, quieter operation and better humidity control.

\* Total Corrosion Protection Technology is available on HRG14-S1P units.

† Check with your local utilities to confirm eligibility. Rebates and incentives for efficiency vary by locality and utility. Comfort-Aire® does not make any representation, warranty, guarantee, or other assurance as to whether the each model qualifies or is eligible for rebates in your local area.

# Comfort-Aire®

## MAKE THE COMFORT-AIRE® DECISION YOU WON'T REGRET.

When you think about everything Comfort-Aire® delivers, your decision is easy. With Comfort-Aire®, all your heating and cooling questions are answered. The performance and reliability you want are right here, and ready to go to work.

**Comfort-Aire®. It's the right choice.**

Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR criteria. Ask your contractor for details or visit [www.energystar.gov](http://www.energystar.gov).

“This product complies with all California product labeling laws including, but not limited to, the Safe Drinking Water and Toxic Enforcement Act of 1986, more commonly known as Proposition 65.”

*Due to ongoing product improvements, specifications and dimensions are subject to change and correction without notice or incurring obligations. Determining the application and suitability for use of any product is the responsibility of the installer. Additionally, the installer is responsible for verifying dimensional data on the actual product prior to beginning any installation preparations.*

*Third party incentive and rebate programs have precise requirements as to product performance and certification. All products meet applicable regulations in effect on date of manufacture; however, certifications are not necessarily granted for the life of a product. Therefore, it is the responsibility of the applicant to determine whether a specific model qualifies for these incentive/rebate programs.*
