**Step 1** Set the motor voltage, rotation, and operating mode.

**Step 2** Connect the learning cable, high speed tap 5, neutral, and ground; power the system to allow Azure® to auto program to the application in 90 seconds.

**Step 3** Finish by removing the learning cable and connecting the 115V motor speed taps.
Digi-Motor®

Direct Drive Blower Applications

PSC and X13 Replacement Motor in One

Easy to Install

- In PSC mode, Azure® wires exactly like a PSC motor (no capacitor required)
- In X13 mode, Azure® accepts the factory power harness and wires directly to the thermostat

Auto-Sizes to Each Application

- During initial set-up, Azure® measures the external static pressure of the system and programs its speed taps to the correct horsepower for each application
- If additional customizing is required, an optional hand held programmer (MARS No. 08502) can be used

Outboard Surge Protection

- Unlike other ECM motors, an outboard surge protector is included with the Azure® wiring harness. This is a replaceable device (MARS No. 08593)

Features:

- Multi HP, reversible, dual voltage
- Auto sizes to each application
- Dedicated 625 RPM speed tap
- Field tunable* (except 10830)
- Ball bearing
- 2 year warranty

Benefits:

- Reduces truck stock
- Automatically provides correct CFM
- Maximizes performance of IAQ equipment
- Customizes the CFM of any application
- Provides quiet operation
- Provides peace of mind

*Motor speed field adjustable with hand held programmer, MARS No. 08502.
